Proposal to Realign Washoe County with Pershing County

The NV Farm Service Agency is considering a realignment of Washoe County from Churchill County to Pershing County. Producers in Washoe County will then be serviced out of the Lovelock Service Center. The reasoning behind this proposal is to make Nevada's service territories more equitable. As it is now, the workload and service territory for the Churchill County Office is considerably larger than those of Pershing County.

The objective is to make it easier for producers to meet with County Staff in face-to-face meetings. For example, Churchill County staff have regularly visited the Pyramid Lake producers to take program sign ups and to update their records. This will continue if not increase in the future.

At its May 23, 2016 meeting, the STC voted to table the proposal. The proposal will be revisited again in the September or October State

Committee Meeting for consideration. Meanwhile the FSA is pursuing Outreach to as many producers as possible to answer any questions as to how this will affect them. If you have a question or comment, please contact the SED at (775) 857-8500 x 128 or at Clinton.koble@nv.usda.gov and he will get back to you as soon as possible. Thank you for your consideration.

Farmers to Receive Documentation of USDA Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

The 2014 Farm Bill requires a customer receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity. Electronic receipts for acreage reports will begin on August 1, 2016.

A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

USDA Offers Help to Fire-Affected Farmers and Ranchers

The [U.S. Department of Agriculture](http://www.usda.gov) (USDA) reminds farmers and ranchers affected by the recent wildfires in Alaska, California, Idaho, Oregon, Montana and Washington State that USDA has

programs to assist with their recovery efforts.

The [Farm Service Agency](#) (FSA) can assist farmers and ranchers who lost livestock, grazing land, fences or eligible trees, bushes and vines as a result of a natural disaster. FSA administers a suite of safety-net programs to help producers recover from eligible losses, including the [Livestock Indemnity Program](#), the [Livestock Forage Disaster Program](#), [the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program](#), and the [Tree Assistance Program](#).

In addition, the FSA [Emergency Conservation Program](#) provides funding and technical assistance for farmers and ranchers to rehabilitate farmland damaged by natural disasters and for carrying out emergency water conservation measures in periods of severe drought. Producers located in counties that received a primary or contiguous disaster designation are eligible for low-interest [emergency loans](#) to help them recover from production and physical losses. Compensation is also available to producers who purchased coverage through the [Noninsured Crop Disaster Assistance Program](#), which protects non-insurable crops against natural disasters that result in lower yields, crop losses or prevented planting.

The [Natural Resources Conservation Service](#) (NRCS) can assist producers with damaged grazing land as well as farmers, ranchers and forestland owners who find themselves in emergency situations caused by natural disasters. The NRCS [Environmental Quality Incentives Program](#) provides financial assistance to producers who agree to defer grazing on damaged land for two years. In the event that presidentially declared natural disasters, such as wildfires, lead to imminent threats to life and property, NRCS can assist local government sponsors with the cost of implementing conservation practices to address natural resource concerns and hazards through the [Emergency Watershed Protection Program](#).

Farmers and ranchers with coverage through the federal crop insurance program administered by the [Risk Management Agency](#) (RMA) should contact their crop insurance agent to discuss losses due to fire or other natural causes of loss. Crop insurance is sold and delivered solely through private crop insurance agents. A list of crop insurance agents is available at all USDA Service Centers and online at the RMA [Agent Locator](#).

When wildfires destroy or severely damage residential property, [Rural Development](#) (RD) can assist with providing priority hardship application processing for single family housing. Under a disaster designation, RD can issue a priority letter for next available multi-family housing units. RD also provides low-interest loans to community facilities, water environmental programs, businesses and cooperatives and to rural utilities.

USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for the Noninsured Crop Disaster Assistance Program (NAP). The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at www.fsa.usda.gov/nap that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

2016 Acreage Reporting Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

Acreage reporting dates vary by crop and by county so please contact your local FSA office for a list of county-specific deadlines.

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the applicable acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the applicable acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of "cover only," "green manure," "left standing," or "seed," then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the applicable dates or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA

office.

Borrower Training

Borrower training is available for all Farm Service Agency customers. This training is required for all direct loan applicants, unless the applicant has a waiver issued by the agency.

Borrower training includes instruction in production and financial management. The purpose is to help the applicant develop and improve skills that are necessary to successfully operate a farm and build equity in the operation. It aims to help the producer become financially successful. Borrower training is provided, for a fee, by agency approved vendors. Contact your local FSA Farm Loan Manager for a list of approved vendors.

Loan Servicing

There are options for Farm Service Agency loan customers during financial stress. If you are a borrower who is unable to make payments on a loan, contact your local FSA Farm Loan Manager to learn about the options available to you.

USDA is an equal opportunity provider, employer and lender.
